How to Brush Your Teeth

It is important to brush your teeth correctly. Brushing your teeth will prevent cavities and other gum diseases. To brush your teeth, follow these simple steps:

1. Wet your toothbrush.
2. Squeeze toothpaste onto your toothbrush so it covers the bristles.
3. Gently brush each tooth in a circular motion. Be sure to brush the front, back, and top of your teeth.
4. Be sure to reach your brush far back so you don't miss any teeth.
5. Spit the foam and saliva from brushing into the sink.
6. Spend at least three minutes brushing your teeth.

To have healthy gums and clean teeth, be sure to brush two times every day. The best times to brush are after breakfast and before bed.
