Multiplication Memory

Directions: Cut out and shuffle the cards. Place them face down in neat rows. Flip over any two cards. The goal is to flip over a repeated addition, array, equal group, or number bond and the multiplication equation it represents. If you get a pair, take the matching cards and keep them. If you do not get a pair, flip the cards back over. Play one of three ways:

Independently: Time yourself. How quickly you can find all the matches?

Collaboratively: Work cooperatively with a friend to see how quickly you can find all the matches together

Competitively: Take turns with a friend flipping over two cards per turn. Who can get more matches?

$2 + 2 + 2 + 2 + 2 + 2 = 12$			
$9 \times 3 = 27$	$8 \times 1 = 8$	$3 \times 5 = 15$	$5 \times 5 = 25$
$7 \times 4 = 28$			$6 \times 2 = 12$
