

What's Included?

Show Me How!

We can use fact families to add and subtract related numbers.

Think of the problem as $4 + \square = 9$

Find the difference.
 $9 - 4 = \square$

Let Me Have A Turn!

Find the difference.
 $8 - \square = 2$

You know that
 $2 + \square = 8$.

Now you can write the four related facts that are in this fact family.

$\square + \square = 8$
 $\square + \square = \square$
 $8 - \square = \square$
 $\square - \square = \square$
