# TO THE ZOO

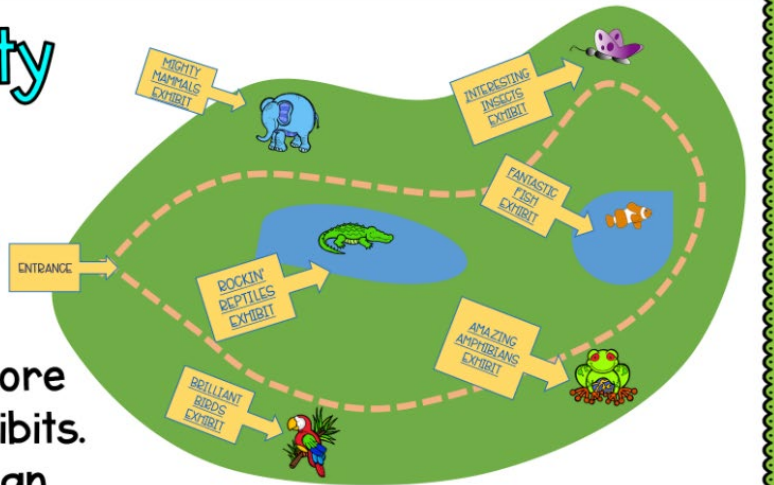

VIRTUAL Field trip

# My City Zoo Map

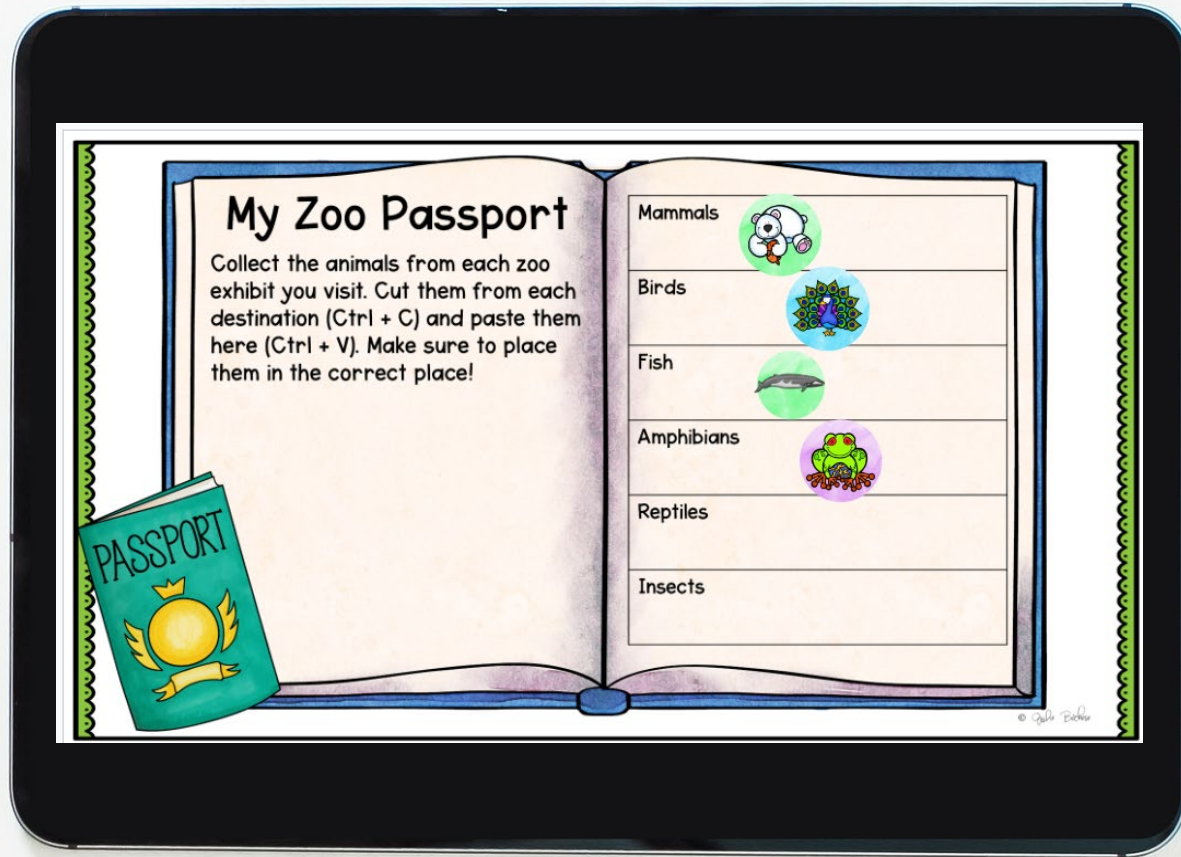

Let's explore animal exhibits.  
Click on an animal!

# EMBARK ON A WILD ADVENTURE AT THE ZOO!

Discover the different animals found at zoo.

# COLLECT STICKERS ON YOUR JOURNEY

Collect animal stickers from  
each zoo exhibit you visit.

# All About Animals

We will meet insects and fish today, too.

**Insects are very important to our ecosystem.** Did you know that spiders are different from insects? Spiders are arachnids (a-rach-nids). Spiders have eight legs and two body parts. Insects have six legs and three body parts. Bees, grasshoppers, and beetles are a few types of insects.

**Many types of fish live in different bodies of water.** Did you know dolphins and whales are actually mammals? They breathe air! Sharks, goldfish and swordfish are just a few types of fish. Fish have gills their entire lives to breathe underwater.

Fish and insects are both cold-blooded.

Underline insects in orange.  
Underline fish in yellow.

# MAKES LEARNING FUN

Integrates reading and  
science in an engaging  
meaningful way.

# INTERACTIVE PIECES

Engaging and exciting learning experiences using interactive, movable pieces.

# LEARN, ENGAGE, EXPLORE THROUGH MULTIPLE FORMATS

- Reading
- Video Clip

**Rockin' Reptiles**

The Reptile Discovery Center Exhibit at the Smithsonian National Zoo has many amphibians and reptiles. We just learned about amphibians. Let's learn about reptiles:

- Almost all reptiles lay shelled eggs.
- Reptiles breathe air with lungs.
- Reptiles have hard scales or shells.
- Reptiles are cold-blooded.

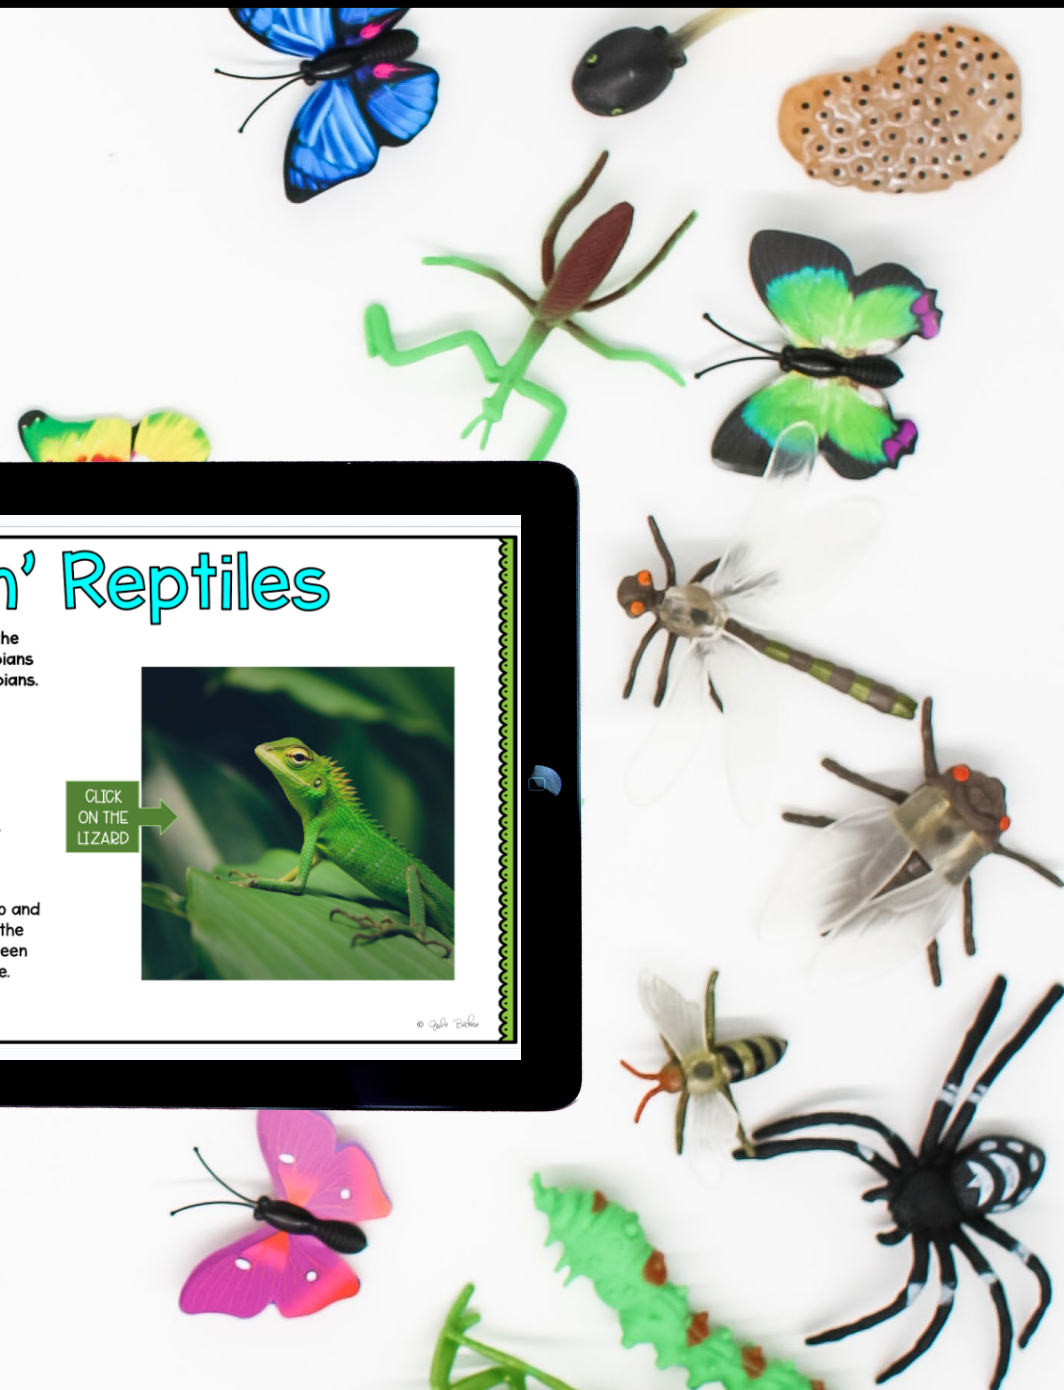

Directions: Click the lizard to watch a video and see all of the reptiles and amphibians at the Smithsonian National Zoo. Then, sort between reptiles and amphibians in the next slide.
