SHUFFLES CARDS, SO STUDENTS
CAN PRACTICE MORE THAN ONCE

A collage of educational materials. In the center is a tablet displaying a math problem: "How many pencils measure 18 or 19 cm?" with a number line from 15 to 19 cm. The number line has 2 'x' marks at 15, 1 'x' at 16, 2 'x' marks at 18, and 3 'x' marks at 19. Below the number line is a pencil icon and a light blue rectangular box for the answer. To the left of the tablet is a worksheet titled "MEASUREMENT CHALLENGE" featuring a tree and a number line with heights 18, 19, 20, and 21 feet. Below the number line is a question: "Which 2 heights can you add to have the same number of trees that measure 21 feet?". To the right of the tablet is a blue pencil case filled with colorful pencils. In the background, there are several worksheets, including one titled "ANSWER SHEET" with a table for recording answers, and another titled "MEASUREMENT DATA" with a number line and a question about toy cars. A blue calculator is partially visible in the bottom right corner.
