## Lady Liberty

The Statue of Liberty stands on Liberty Island. This island is in New York Harbor. This statue was a gift. It is from France to the United States. France helped the United States in the American Revolution. The Statue of Liberty honors that friendship. It is a symbol of freedom.

Frédéric Bartholdi designed the Statue of Liberty. It was built in France in pieces. The pieces were shipped to the United States. They crossed the Atlantic Ocean in 1885. An iron frame was built first. Gustave Eiffel designed that frame. He also made the Eiffel Tower in France. The statue's frame holds the outer skin. The skin is made of 300 copper sheets.

The statue is modeled after a goddess. Her name is Libertas. Its face, however, looks like Bartholdi's mother. A crown with seven spikes is on the head. The statue holds a torch in its right hand. A tablet is in its left hand. The tablet has *July 4, 1776*, on it. This is America's Independence Day. Broken chains are at the statue's feet. These symbolize breaking free from England. A famous poem is on the base. The poem welcomes immigrants to the United States. The statue is 305 feet 1 inch tall from base to torch tip. It weighs 225 tons.

The Statue of Liberty faces southeast. It greets boats coming into the harbor. A ferry brings guests to Liberty Island. Visitors can go inside the statue. There is a museum in the base. People can climb the 354 steps to the crown. Twenty-five windows in the crown give a view of the area. Seeing the Statue of Liberty reminds people of the importance of freedom.
