3 VERSIONS

The Season of Spring

Spring is one of the four seasons. It comes after winter and before summer.

When spring comes, the weather gets warmer. This means we can play outside and don't need heavy coats. We see lots of flowers blooming. Blooming means the flowers are growing. These flowers are so colorful! We see red, yellow, blue, and many other colors.

Spring is also a time when animals become very active. Birds sing in the trees. Baby animals, like bunnies and ducks, are born. Bunnies are baby rabbits.

We also see a lot of rain in spring. Rain helps the plants and flowers grow. After the rain, we can see a rainbow. Rainbows have many beautiful colors.

1. When is St. Patrick's Day celebrated?

- a. February 14th
- b. July 4th
- c. March 17th
- d. December 25th

2. What country is important for St. Patrick's Day?

READING COMPREHENSION CHALLENGES

- Challenge #1
- 
1. Read the story and answer the questions.
 2. Use your answers to follow the marigolds.
 3. Collect some marigolds after the challenge to take back to your own *ofrenda*.
- 

Día de los Muertos, or The Day of the Dead. Today was the big parade. Alejandro was so excited to watch it. He loved parades, and his cousin, Luis, had told him all about this one.

"You've never seen anything like it!" Luis had said over the phone.

Now, Alejandro held Alicia's hand. His little sister was jumping up and down beside him while his parents stood behind them. "Calm down, Alicia. I don't want to miss the start of the parade. We've been waiting so long for this!"

"That's like asking her not to breathe," Mom said as she smoothed her hand over Alicia's curly black hair.

It was true. Alicia was always in motion. She couldn't sit still for two seconds. Alejandro's arm felt like it might fall off because of all her wiggling as she held his hand. He supposed a parade like this was a reason to be full of energy. The scene was festive. There were people everywhere, laughing and talking. Music from somewhere down the street traveled on the breeze. Many of the parade watchers had their faces painted to look like skulls. The scents of delicious

Marigolds!

The World of Bats

There are many different bats. There are more than 1,400 types of bats in the world. Bats come in many sizes. The bumblebee bat is as tiny as your thumb. The flying fox has wings as big as a grown-up's arm!

The Flying Fox Bat

Bats live in many places. You can find them in caves, trees, and even under bridges. They come out at night to find food. Most bats like to eat bugs, but some bats eat fruit. Yummy!

Bats are important. They help the Earth stay healthy. Bats that eat bugs help keep nature balanced. Bats that eat fruit help plants grow by spreading seeds. Bats are not just creatures of the night. They make our world a better place.
