Challenge:

24

How many flowers are left?

a. 15
b. 20
c. 30
d. 32

25

How many apples are left?

a. 5
b. 20
c. 30
d. 35

26

What is 10 less than the number circled?

a. 43
b. 38
c. 35
d. 33

27

What is 30 less than the number circled?

a. 33
b. 43
c. 55
d. 60

SUBTRACT MULTIPLES OF 10

Ways to Use Task Cards

- 1 Centers
- 2 Scoot: Pass out one card for each student. Set a timer and say, "scoot!" when the timer goes off. Students move seats to the next card. They continue to rotate until they are back at their original seat.
- 3 Scavenger Hunt: Hide cards around the room. Students search for cards and answer them.
- 4 Jenga: Number Jenga blocks. Students stack the blocks, then take turns pulling blocks. Students answer the corresponding number card.
- 5 Whole class practice: Teacher displays card on the projector. Students answer on mini white boards.
- 6 Exit Tickets: Give each student a task card at the end of the lesson. Have them answer on a sticky note.

A collection of seven crayons in various colors (red, orange, yellow, green, blue, purple, and grey) are arranged diagonally across the page. In the background, a purple crayon box is visible, featuring the number '22' in a yellow circle. The box also has some text, including 'There' and 'done', which is partially obscured by the crayons.

STANDARDS ALIGNED

11

Three triangles form which shape?

- a. trapezoid
- b. parallelogram
- c. triangles
- d. pentagon

27

Which two 3D shapes make this house?

- a. two cubes
- b. cube & triangular prism
- c. triangle & square
- d. cone & cube

4

Which two shapes create this pentagon?

- a. rectangle & triangle
- b. two pentagons
- c. triangle & trapezoid
- d. rectangle & trapezoid

5

Two rectangles put side by side make a:

- a. hexagon
- b. triangle
- c. circle
- d. larger rectangle

2

A square and a triangle put together can make a shape that looks like a:

- a. hexagon
- b. circle
- c. a house
- d. cube
